Professional Summary

SAP Integration Consultant with 3+ years of experience in SAP BTP Integration Suite (CPI) and SAP PI/PO, specializing in designing, developing, and supporting enterprise-scale integration solutions across SAP and non-SAP landscapes.

Experienced in building secure and scalable integration frameworks using REST, SOAP, OData, IDoc, and API-based connectivity patterns. Strong expertise in SAP Integration Suite, integration security, monitoring, troubleshooting, error handling, and performance optimization.

Hands-on experience collaborating with business stakeholders, solution architects, and cross-functional teams to deliver cloud and hybrid integration solutions aligned with enterprise standards. Proven ability to support S/4HANA transformation initiatives, implement secure communication using OAuth 2.0 and certificate-based authentication, and drive integration modernization through reusable design patterns and best practices.

Technical Skills

SAP Technologies	SAP BTP Integration Suite (CPI), SAP PI/PO 7.5, SAP Integration Advisor, SAP HANA
Integration Architecture	API-Led Integration, Enterprise Integration Patterns, Hybrid Integration, Synchronous & Asynchronous Messaging
Protocols & Services	REST, SOAP, OData, HTTP, HTTPS, RFC, IDoc, JDBC, JMS
Security	OAuth 2.0, SSL/TLS, Certificate-Based Authentication, Keystore Management, Basic Authentication
Adapters Used	SFTP, File, SOAP, OData, HTTP, REST, IDOC, RFC, JMS, JDBC
Development	Groovy Scripting, Graphical Mapping, XSLT, UDF, Message Transformation
Monitoring	SAP CPI Monitoring, Message Monitor, NWA, Alert Framework, Error Handling
Tools	Git, Postman, SOAP UI, VS Code, Eclipse, Jira, Integration Advisor
Languages	Java, Groovy, XML, XSLT, SQL

Professional Experience

SAP Integration Consultant

IBM India, Bengaluru

July 2023 – Present

- Designed, developed, and supported 50+ enterprise integration interfaces across SAP BTP Integration Suite (CPI) and SAP PI/PO landscapes.
- Collaborated with business stakeholders, functional teams, and solution architects to define scalable integration solutions aligned with enterprise architecture standards.
- Developed and implemented end-to-end integrations using REST, SOAP, OData, IDoc, File, JDBC, and JMS technologies across SAP and non-SAP systems.
- Built scalable and secure iFlows leveraging enterprise integration patterns, message transformation, routing, and exception handling capabilities.
- Implemented secure communication using OAuth 2.0, HTTPS, SSL certificates, and certificate-based authentication mechanisms.

- Designed reusable integration components and error-handling frameworks to improve maintainability, reduce development effort, and enhance operational efficiency.
- Performed root cause analysis, troubleshooting, and performance optimization for high-volume production interfaces while ensuring SLA adherence.
- Implemented monitoring and alerting mechanisms for proactive identification and resolution of integration issues across enterprise landscapes.
- Worked closely with global cross-functional teams to deliver integration enhancements, production support, and continuous improvement initiatives.
- Participated in technical design reviews, architecture discussions, and governance activities focused on integration standardization and best practices.

Project Highlights

PepsiCo Beverages North America

Oct 2024 – Present

- Led development and support activities for 35+ SAP CPI and SAP PI/PO interfaces supporting critical business processes.
- Collaborated with stakeholders and solution teams to design scalable API-based integration solutions across SAP and non-SAP applications.
- Improved operational stability through proactive monitoring, issue resolution, and performance optimization initiatives.
- Developed reusable integration components and common frameworks to accelerate project delivery and reduce maintenance efforts.
- Implemented secure integration solutions using OAuth 2.0, certificates, and enterprise security standards.
- Performed payload optimization and tuning for high-volume interfaces to improve processing efficiency and reliability.

PepsiCo South Africa

Aug 2023 – Oct 2024

- Designed and developed SAP CPI integration solutions across multiple business domains and enterprise applications.
- Conducted requirement analysis, feasibility assessments, and technical design activities for new integration requirements.
- Worked closely with business users and technical teams to ensure successful implementation and deployment of integration solutions.
- Delivered production support, enhancements, and defect resolution while maintaining high service availability.
- Contributed to integration design discussions and development best practices to ensure solution consistency and maintainability.

Education

B.Tech (Computer Science)	Lakshmi Narain College of Technology Excellence, Bhopal, MP
Graduation	May 2023
CGPA	8.8/10

Certifications

- SAP Certified – SAP Integration Suite (2024)

- SAP Certified – SAP Master Data Governance (2025)
- SAP Certified – SAP S/4HANA Cloud Private Edition – Sourcing and Procurement (2026)
- Microsoft Azure Fundamentals – AZ-900 (2023)
